PROJECTS

- **Bank Statement Analyzer** 
In-Progress
It is a software application that can analyze a bank statement and provide useful insights on the customer's financial transactions.
- **Reservation Systems with Java and SQL** 
May'21 – Aug'21
App to manage data for Flight Reservation made with Java and SQL server.
- **V-CAPTCHA** 
May'22 – June'22
In our project we have used Python to implement the Voice Captcha in which we a user does not have to type the Captcha. At place of typing the Captcha user can simply speak the Captcha.
